

# Telecom Expense Management

## ENTERPRISE-VIEW™

Telecom Expense Management (TEM) using WCS' web-based tool ENTERPRISE-VIEW is the fastest way to realize significant savings and improved profitability

### SERVICE OVERVIEW

With WCS Enterprise-View, you can also receive a fully managed wireless solution that keeps your wireless accounts optimized every month. Are you tired of those "one-time" wireless audits that deliver short-term optimization? With WCS, your account is automatically audited daily, guaranteeing "real-time" accuracy of inventory, billing and plan optimization

Plus with WCS' ABACUS consolidated billing, you receive a single monthly invoice for all carrier products and services. ABACUS is designed to provide customized billing records and reports that empower you to more effectively manage the invoice payment process across multiple cost centers and multiple accounting codes.

Manage your telecom and wireless services with our exclusive web-based software, Enterprise-View TEM & Wireless Control Manager. By centralizing all your carrier accounts onto one application, you will save time and money.

Want to finally gain complete control of your inventory and costs, and ongoing maintenance? Call us today, you will be in control tomorrow!

### BENEFITS

Some of the benefits of managed wireless:

- Helps control costs with enhanced visibility and proactive management of your telecommunication expenses.
- Allows you to gain credits through monthly electronic invoice acquisition, telecom billing error validation, and ongoing billing dispute management.
- Reduces complexity and staffing requirements through streamlined, integrated and automated processes and access to WCS specialists.

### Let WCS Help You Manage Your Entire Network!
