

Complete Voice Solutions

INTEGRATED/DYNAMIC T1

ONE CONNECTION FOR VOICE, LONG DISTANCE & INTERNET ACCESS

Integrated Dynamic T-1 Access gives you local and long-distance service with a blazing-fast T-1 Internet connection. Make unlimited local and long-distance calls within your network. Plus, improve your voice and data network without investing in new hardware.

SERVICE OVERVIEW

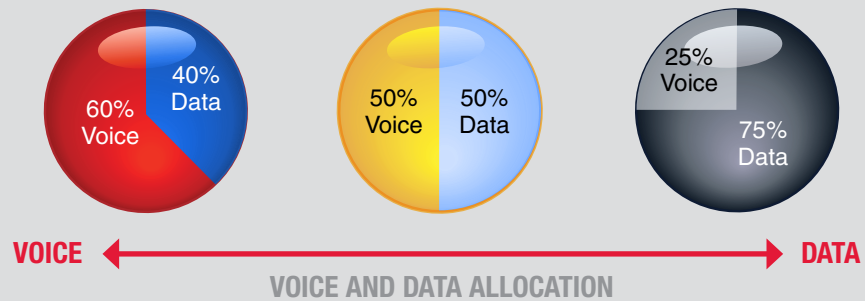

Dynamic T-1 dynamically balances real-time changes in your business traffic needs. Available in over 300 major markets in the US, Dynamic T-1 is the product of choice for most business locations.

WCS offers a powerful and affordable voice and data convergence solution that is dynamically balanced for the daily changes in your business traffic demands, with availability priced far below separate voice and data lines.

DYNAMIC T1 GIVES YOU VOICE AND DATA ON A SINGLE CIRCUIT

DYNAMIC T-1

DYNAMIC BANDWIDTH ALLOCATION

BENEFITS

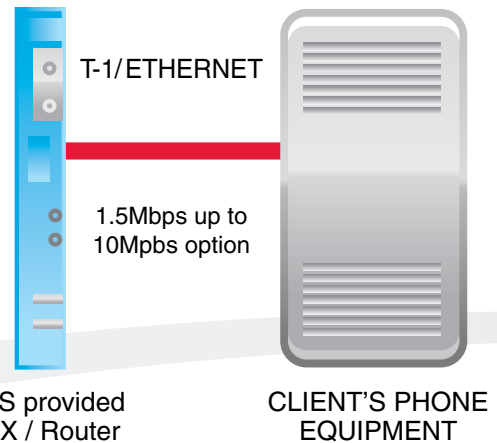

- Voice and Data on one circuit – Voice calls receive priority over data via a managed router (QoS) – Data receives additional bandwidth when less voice is utilized, so you get maximum use at all times.
- Widely available in most metro population and suburban markets.
- Virtual DIDs. Get the local numbers you need from across the country or around the world which ring locally to your phone system!
- Toll-Free service available, domestic and international.
- Works with IP-VPN and MPLS.

ULTIMATE VALUE

Dynamic T-1 is the ultimate in flexibility and savings. WCS leverages its decade long leadership in the telecom industry to bring you lowest rates on your local and long distance calling. And the Dynamically allocated voice and data circuit brings additional savings in allowing for the full utilization of available bandwidth.
